PERSONAL STATEMENT

Versatile software engineer with deep expertise in back-end development using Laravel. Skilled in designing RESTful APIs, implementing secure authentication systems, and optimizing databases. Experienced in Agile environments, collaborating with cross-functional teams to deliver scalable, high-performance software. Committed to driving results and staying updated with the latest technologies. .

EDUCATION

Assiut University

Sept 2020 – June 2024

 Assuit, Egypt

PROJECTS

Drive App

 Oct 2023

Developed a web application for file management and sharing, similar to Google Drive, using Laravel MVC. Key features include document storage, user access control, and secure file sharing. Focused on scalable architecture and efficient user collaboration.

E-Commerce Api

 Feb 2024

Developed a RESTful API for an eCommerce platform with endpoints for products, orders, and user accounts. Implemented secure user authentication, executed CRUD operations with data validation, and optimized database performance. Integrated frontend functionalities using Laravel.

-  [Github Link](#)

Messenger Api

 Mar 2024

Developed a RESTful API for a messaging application, enabling real-time communication and secure messaging. Implemented user authentication, designed message endpoints, and collaborated on frontend integration. Ensured API security, conducted thorough testing, and documented the API to meet industry standards using Laravel.

Mahloula App

 June 2024

Developed a RESTful API for Mahloula, a Home Services app, enabling seamless mobile-to-admin dashboard integration. Implemented secure authentication, robust data management, and interactive features. Designed an intuitive admin dashboard for efficient content management. Deployed on Hostinger for scalability and optimized performance. Performed extensive testing to ensure reliability and performance, showcasing advanced skills in Laravel as a graduation project.

SKILLS

Programming Languages

C++ Java PHP JavaScript HTML
CSS jQuery Python C#

Conceptual Knowledge

OOP Data Structures Design Patterns : MVC
Data Bases: Microsoft SQL Server, MySQL
RESTful APIs Agile Development Git

Personal Skills

Problem Solving Fast Learning
Communication Skills Analytical Skills
Code Review Teamwork Leadership

EXPERIENCE

Trainer

Instant Company

 8:9 2023  Offline

Conducted training sessions as a Full-Stack Web Developer specializing in Laravel. Provided in-depth instruction on Laravel fundamentals, advanced development techniques, and best practices for web application development.

Backend Developer

Idaam Cloud Company

 Current  Remote

Currently working remotely as a Junior Laravel Backend Developer at Idaam Cloud Company. Responsible for backend development, including designing and maintaining scalable applications, optimizing database performance, and implementing secure and efficient solutions.
